# BARTLETT AND **COMLEY FAVOR**

O'Connell Only Bridgeporter to **Vote Against Increase** in Cost

Senator John M. O'Connell was the only Bridgeporter to vote yesterday against the Senate's adoption of the bill raising the cost of liquor licenses to \$750. Senators Frederic A. Bartlett and William H. Comley, Jr., voted for the higher license. The bill required a long debate and a vote was not reached until late in the afternoon.

The chief fight centered on the adop-tion of the House amendment which substituted in the bill the minority fig-ure \$750 instead of the majority figure of \$600. The roll call showed a vote of 18 to 17 in favor of the adoption of the

mendment. Senator O'Connell was against the Comley were for it. On the passage of the bill, the Bridgeport senators did change their votes. Senator Salmon, of Westport, voted for the higher li-cense in both instances.

## TESTIFIES HE SAW HIGGINS TRYING TO PICK HILL'S POCKET of prominent women are patronesses

Witness Supports Robbery Claim of Slayer in Hearing Before Coroner

Nothing that would show whether or not more than two persons were in the Danbury lodging house when Jo-seph B. Hill killed George W. Higgins of this city, in a scuffle, was brought out yesterday afternoon at the hearing before Coroner J. J. Phelan, held in the city court room at Danbury. The testimony of Mrs. Anna Squiras, who lives in the same building, intimated that there were more than two, however, when she said somebody that must have been using a cane, judging from the thumping on the stairs, left the building.

When testifying, Hill related dra-matically how he had killed Higgins. He demonstrated how he was being choked by Higgins and how he had taken his knife from his pocket with his free hand, opened it with his teeth and cut Higgins' throat. Higgins had had said he was going to murder him,

Alvin C. Hoffman of 78 White street gave testimony that tends to support the robbery claim of Hill. Hoffman said he saw Higgins trying to pick the old man's pocket, earlier in the even-

# STRANGER'S LOT?

Emily Emmet, At Last In Her Furnished Room, Profits By Her Experiences in Seeking Home on a Limited Amount of Money.

Done To Protect and Assist the Working Girl Who Comes Here Willing To of articles to select at 25c. Pay But Unable to Find

(By Emily Emmet.) At last I had found a furnished oom! The kindly young couple who had housed me without question had aiready begun to accept me as a member of the family. The room, the parler of the young people, was bright attractive and clean, and I knew that any girl in the position which I represented could consider herself indeed fortunate to have found such com-Citizen Asks Claims Committee fortable quarters.

It was after the young people had left me and I sat alone in the dark waiting for them to retire, that all the occurrences of the night came Charles E. Jelliffe petitioned the back to me in vivid form.

What might have happened had I found no place to stay, I thought, or had the young man who had proved a good Samaritan been otherwise than good and led me to believe in him and housed me in one of those boarding houses which were below moral stan-

transferred the property to F. N. Curtis and A. W. Fuller. In 1879 it came into the possession of Mr. Jeliffe. He supposed that the taxes for 1876 had I had been most fortunate it seemed. Was mine an unusual case? Would the average girl have met with such kindness as it had been my lot been paid by Curtis and Fuller but it later developed that the assessment eventually to find?

for that year had not been paid and a lien was filed against the property that clouds the title. The rate book of that year cannot be found. Under the circumstances the property cannot be sold with a clear title. The committee will probably grant the petition and It occurred to me also how I had tried everywhere to get directed to some place of refuge. With the Protective Home, the Y. W. C. A. and other charities in mind I had asked of the proprietor of every house where I inquired for rooms if they knew of some place where I could go. Apparently these were unknown to them for I couldn't succeed in getting directed to them. As after leaving the railread station I hadn't happened to meet any policemen, the chance of asking them for direction had not offered itself.

Paramount was the thought that mething must be done and done immediately. Girls of the type I represented are coming in every day at the station—girls are seeking rooms every day. Who knows what diffi-culties they are encountering? Who knows whether they all meet with

The station is the most vital spot. At present it becomes in some instances, at least, a decided turning point in the lives of girls who come to this city to seek work and lodgings.

True it is that there is a sign in the main part of the station near the ages to her home near Lincoln school. She claims an alley between the school door to the ladies' room which says

ment of interest and taxes on property in Central avenue. She claims when insuccessful application for room at the Boarding Home of this institution. purchased the property she was There are in Bridgeport a number told in the tax collector's office that the taxes for 1908 had been paid. of organizations of young women who are sincere in their charitable efforts David F. Watson asked for an exten-sion of time for the paying of taxes on three pieces of property in the West End. The three months' extension of and quick to remedy an evil once

they see the necessity and realize that it is within their power. Let these societies, singly or collectively, maintain a bureau, centrally located—the station is the most vital lace where girls such as I imper-

sonated may turn for assistance.

There should be no atmosphere of February 24. She claims to have ex-pended considerable money for medi-cal freatment and to have suffered charity about this place. Let it be a business enterprise, a furnished com exchange if you please, but let much pain from the dislocation of her the shoulder by the fall. Attorney Thomas M. Cullinan represented her. it not become a place where only the penniless will turn for shelter.

When I represented myself as a working girl looking for a room, I felt the part. But I would have hes-itated a long time before appealing LICENSES NEXT SATURDAY for alms. I had little enough, it is but I was willing to pay Saturday, May 1, is the last day shelter. The trouble was to find the for taking out dog licenses. After shelter. Girls who work have pride w, an additional penalty of \$1 added to the cost of the liThe town clerk's office will until 9 o'clock this evening independent. This spirit among the be open until 9 o'clock this evening working girls will retard them from taking advantage of anything that savors of public charity.

Let us have signs displayed conspicuously telling girls where to go for this needed information. Let us educate our policemen to know what is going on in the city, that girls such as I may not be directed to boarding houses where the surroundings may ot be wholesome.

The need is a vital one and of far greater importance than many problems which are now occupying the time and efforts of the numerous societies for doing good in this city.
"Why." I wondered, and am still wondering, "do so many houses prominently display, 'furnished rooms for rent' signs, when inquiry at the door brings the information that there are no rooms to be had?"

It will be remembered that Mr. and Other employes of the factory gave similar testimony. Sambourski alone Mrs. G..., the kind hearted young couple who had taken me to room, were moving from one house into an-other and I was to stay alone in the new house. Before they left, I had called Mrs. G aside and told her that while I had only \$2 I wanted to pay for the night and gave her fifty cents which I had said, if I found work and stayed, could go toward the week's room rent. She had told me that I might do as I pleased about that and accepted the money.

When there was no longer danger of encountering any of my benefactors, lars wrote a short note of thanks which tree. I left on the pillow, and then quietly

hung out to get smoked up.

A seat on the New York Stock Ux-change now costs \$62,000, but a 50 cent seat at the ball grounds is more profitable for most people.

The English advance is delaying while a reserve of ammunition is be-ing accumulated, and perhaps as soon as a reserve of macaroni has been secured, Italy-will go to war,

Arsenicals Most Effective Remedy Against This Pest.

Washington, April 28-The conspicuous, unsightly nests or tents of the apple-tree tent caterpillar are familiar objects in the spring in trees along the roadways, streams and fences, in neglected orchards, and else-Several methods of checking the depredations of this caterpillar profitable to adopt a system of spray are given in a new publication of the ing which will control not only tent Department of Agriculture, Farmers' caterpillars but such serious pests as

Bulletin No. 662.

These gregarious caterpillars construct the tents for their protection, and these, at first small, are gradually from the curculio. enlarged often to a foot or more in height and diameter, the size varying with the number of individuals in the The caterpillars feed upon the foliage of the trees, stripping the trees the arsenate of lead is prefereaves from the limbs adjacent to the able, as it is less injurious to foliage nest, and if there be several colonies and on all trees sticks much better. In a tree, as is frequently the case during period of abundance, the foliage may be quite destroyed, leaving the branches as bare as in midwinter. Species of the tent caterpillar are found quite generally over the entire grown, and prompt treatment stops.

United States. The moths deposit further defoliation of the trees. their eggs by early midsummer, or earlier in the South. By fall the embryonic larvae is practically full

grown, within the egg where it remains until the following spring. With the coming of a warm spell the larvae scape by gnawing through their eggshell, often before there is foliage out for food, and under these circum stances they may feed upon the glutinous covering of the egg mass. Methods of Control

The tent caterpillar feeds principally on wild cherry and apple trees, but will attack many other plants and where such trees can be remove without disadvantage this should be done, thus lessening its food supply. During the dormant period of trees when the leaves are off, the egg masses are fairly conspicuous, and with a little practice may be readily found; it is then that they should be cut off and burned. Trees infested with larvae during the early part of the year, or those in the immediate vicinity, are perhaps more like ly to be chosen by the parent moth for the deposition of her eggs, and such trees at least should be search ed if it is not practicable to extend the work to the orchard as a whole This work may be combined with pruning to good advantage, and a eggs and cocoons of other injurious species which pass the winter on the

When two egg masses are deposited close together, the resulting caterpillars may form a common nest. These nests are gradually enlarged and soon furnish ample protection. If the cat-erpillars are destroyed as soon as the small nests are detected, this will prevent further defoliation trees, and the rule should be adopted either of two practices may be adopted, namely, destruction by hand or with a torch.

may be torn out with a brush, with gloved hand, or otherwise, and the larvae crushed on the ground, care being taken to destroy any caterpillars which may have remained on the

The use of a torch to burn out the nests will often be found convenient, especially when these occur in the ing bonfires, as your neighbors will perhaps then have some clean clothes men, will be satisfactory or construction of the satisfactory of the sat e made simply by tying rags to the end of a pole. The asbestos or rags are saturated with kerosene and lighted and the caterpillars as far as possible cremated. Some caterpillars, however, are likely to escape, falling from the nest upon the application of the torch. In using the torch great care is necessary that no important injury be done the tree; it should not be used in burning out nests except in the smaller branches and twigs,

the killing of which would be of no special importance. Nests in the larger limbs should be destroyed by hand, as the use of the torch may kill the bark, resulting in permanent

Spraying With Arsenicals Tent caterpillars are readily de-

Tent caterpillars are readily destroyed by arsenicals sprayed on the foliage of trees infested by them. Any of the arsenical insecticides may be used, as Paris green, Scheeles green, arsenate of lead, etc. The first two are used at the rate of 1-2 pound to 50 gallons of water. Milk of lime from 2 to 3 pounds of stone lime should be added to neutralize, any caustic effect of the arsenical on three caustic effect of the arsenical on thre foliage. Arsenate of lead - used at the rate of 2 pounds to each 50 gal-
